## **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Rolf Fasth on 8/9/2007.

The application has been amended as follows:

Claim 1 has been amended as follows:

On line 9, the phrase "branch node" has been replaced with "branch mode".

Claim 11 has been amended as follows:

On line 14, the sentence "the first node receiving the second packet; and" has been deleted.

2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1,

The prior art of record does not teach or fairly suggest a method, apparatus or system for a node sending a first packet via a first access port to the node; when the node is in a leaf mode, the node adding a tag inside the first packet, the tag containing a first port number corresponding to the first access port and when the node is in a branch

Application/Control Number: 10/707,916

Art Unit: 2616

mode, the node adding the first port number to the tag, and sending a second packet, tagged with information containing a second port number corresponding to the second access port, via the first uplink to the node, the node receiving the second packet, the node removing a second port number corresponding to the second access port from the tag and the node sending the second packet via the second access port.

Regarding claim 11,

The prior art of record does not teach or fairly suggest a method, apparatus or system for a node sending a first packet, tagged with information containing a first port number corresponding to the first access port, via a first access port to the node, the node receiving the first packet and sending the first packet via the a first uplink and a second uplink to network edge equipment and sending a second packet, tagged with information containing a second port number corresponding to a second access port, via the second access port to the first node, the first node receiving the second packet and sending the second packet via the first uplink and the second uplink to the network edge equipment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 10/707,916

Art Unit: 2616

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Burwell (US20040131064) teaches digital communications system.

Opalka (US6259699B1) teaches system architecture for and method of processing packets and/or cells in a common switch.

Douceur (US6041053A1) teaches technique for efficiently classifying packets using a trie-indexed hierarchy forest that accommodates wildcards.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony Sol whose telephone number is (571) 272-5949. The examiner can normally be reached on M-F 7:30am - 4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hassan Kizou can be reached on (571) 272-3088. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2616

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
